WING LOADING CHART FOR SKYDIVERS PRIOR HOLDING C-LICENSE

Exit weight is your weight + 11…15 kg varying due to clothing, different gear, weight belt etc. Wing loading is not allowed to exceed 1.34 lbs/sqft (red zone in the chart).

Dark green zone covers the recommended wing loading. Wing loading is allowed to be on yellow zone for skydivers with B-license. Wing loading should not be too low, see the chart down right, light green and red.
